GOALS

Creative and hard-working web developer that has the ability to quickly assimilate new technologies. When working with a team what I value most is communication, growth, and organization. Through many customer-service experiences throughout multiple industries I've strengthened my communication and interpersonal skills making me a valuable asset who can effectively engage with clientele or team members.

PROJECTS

¿DONDÉ?

Description: This application was designed for the everyday person. Ask yourself this question; Have I ever needed a vacation so badly, but did not know where to start...yeah of course you have, we ALL have. Welcome to Dondé, (where) we take the hard work of planning Trips out of your hands! Our site helps optimize your travel itinerary to let you make the most out of your trip!

Technologies: React Js, JavaScript, Google API
URL: <https://github.com/jmasone15/travel-planner-project>

LEFTOVER | HANGOVER

Description: Leftover Hangover is a fridge to table application that allows the user to input the ingredients they have in their kitchens, and returns some possible recipes they could make. On the other side of the application, users can input what alcohol or mixers they have, and the website will return some drink recipes they could make. .

Technologies: HTML, CSS /Bulma, JavaScript/jquery, Ajax, Api's Edamam Recipe/CocktailDB Drink Recipe
URL: <https://jrlaro.github.io/JJAM>

EMPLOYEE DIRECTORY

Description: This application assist the user by filtering through a list of employees. With the easy to use functionality, all the user has to do is enter the name of the Employee they are wanting to search for and click "Search" and VOILA, The user can also just put the beginning letter and they will still be presented with a more concise list. The application also features a (Sort by) feature - where they can simply click on either the First Name, Last Name, Phone and or Email and the Employees will be

Technologies: React.js, JavaScript, Random User API
