## GOALS

Currently studying at the University of Central Florida's BootCamp Program as Full-Stack Developer.

## TECHNICAL SKILLS

HTML
CCS / Bootstrap / Bulma
JavaScipt / jquery
Api's
AJAX
Node.js

## PROJECTS

### LEFTOVER | HANGOVER

**Description**: Leftover Hangover is a fridge to table application that allows the user to input the ingredients they have in their kitchens, and returns some possible recipes they could make. On the other side of the application, users can input what alcohol or mixers they have, and the website will return some drink recipes they could make. .

**Technologies**
- HTML
- CSS / Bulma
-JavaScript / jquery
-Ajax
-Api's
• Edamam Recipe
• CocktailDB Drink Recipe
URL: https://jrlaro.github.io/JJAM

### WEATHER DASHBOARD

**Description**: This application utilizes an OpenWeather API which retrieves weather data for cities that are inputted by the User. Once the User enters a city they will be presented with the current weather of their selected city which includes the current temp, humidity, wind speed, as well as uv. A 5 day forecast also reflects.

**Technologies**
- HTML
- CSS / BootStrap
-JavaScript / jquery
-Ajax
-Api's
• OpenWeather
URL:https://jrlaro.github.io/weatherDashboard

### PASSWORD GENERATOR

**Description**: This application randomizes a generated Password based off certain criterial parameters. The User is prompted to answer a series of questions which will return a randomized password.

**Technologies**
- HTML
- CSS / BootStrap
-JavaScript / jquery
